

Grooving Tool

AASHTO Metal Grooving Tool

Liquid limit grooving tools are used in determining when a soil's water content is at the point when the soil changes from a liquid to a plastic state. It meets the AASHTO standards for liquid limit testing. Grooving tools are used with all versions of the liquid limit machine.

ASTM Metal Grooving Tool with Gauge

Grooving tools with gauge block meet ASTM D4318 specifications. The gauge block is used to adjust the height of a drop. This device is also available in plastic.

ASTM Plastic Grooving Tool

Plastic grooving tools conform to ASTM D4318 and come in a package of 10. They do not include a gauge block.
