

# Sulfate Soundness Sieve Holder

The sulfate soundness sieve holder carries up to seven stacked sample sieves. The sample sieves holding aggregate are stacked into sieve holders. The holder keeps the sieves in place for immersion during sulfate soundness testing. Samples are washed, dried and sieved to determine the percentage of loss from the original sample.

## Features

- Stainless steel frame allows optimum fluid circulation
- Attached handle locks upright and folds down for easy loading into drying ovens
- Meets AASHTO T 104, ASTM C88, California 214 and PennDOT 510 standards

## Included Items:

- HM-477 Sample Sieve Holder with handle
